Heather Hart

Objective Dental Laboratory Technician

Highlights of Qualifications

- Three years of dental laboratory training and clinical experience
- Experience making dental prostheses for both children and adults
- Worked in a fast-paced, high volume lab that received and completed prescriptions for up to 20 different dental offices

Prosthodontic/Orthodontic Construction

- Examined models and impressions, read specifications in order to determine the design of close to one hundred dental prostheses to be constructed
- Strict adherence to prescriptions/orders to make or repair dentures, dental crowns, bridges, orthodontic appliances and other dental prostheses
- Experience pouring molds, constructing baseplates and dentures
- Skilled with full and partial denture occlusal grinding, set cases onto models, made minor repairs and completed polish and high shine

Material Handling

- Worked with various materials, including waxes, plastics, alloys, stainless steel, porcelains, and composites or polymer glass combinations
- Melted metals, mixed plaster, porcelain, or acrylic pastes; poured materials into molds or over frameworks in order to form dental prostheses or apparatus
- Adhered to strict safety guidelines while handling materials
