Learning Styles Reflection

Recently you completed an extensive learning styles survey – the Dunn and Dunn model – and Glenna Barrick Harwood discussed the results with you in class. Your assignment now is to reflect on what you learned about yourself and how you learn, and write about it.

Your paper should be between 1 and 2 pages long, no longer than 3 pages, typed or word processed and double spaced. It will be due Feb 21st.

Please include information about

- Which learning style survey you completed
- A description of your particular learning style – both your strengths and weaknesses
- Examples of the best way(s) for you to take in information
- Examples of the best way(s) you can study for your classes
- Examples of the best way(s) for you to memorize information
- Problems you might encounter in the traditional college lecture classroom and how you can "cope" or adapt your style

If you didn't participate in the Dunn and Dunn assessment or missed Glenna's presentation you'll need to complete a learning styles survey on your own. The following are some links to different surveys – pick one and complete.

Learning Style Survey for College - Diablo Valley College
