The tenth annual Tech Camp for teachers will take place July 21-25, 2008, on the Lake University campus from 8:30 a.m. to 4:30 p.m. daily. Tech Camp offers teachers a chance to learn techniques in teaching the latest software and computer programming. It also provides opportunities to discuss curriculum, assignments, new teaching strategies, and level objectives. Tech Camp attendees get to meet with college professors and authors to discuss collaborative projects, articulated credit, and college expectations.

There is plenty of time for teachers to talk in small, subject-interest groups as well. Lake University sponsors one breakfast and one lunch during the week, lots of snacks, and optional housing and meal cards for teachers from around the state.

Each day is a balanced mix of lecture, discussion, demonstration, and lab time. Attendees receive free copies of the latest textbooks and trial software. Other positive byproducts of the week have been articulation agreements, part-time teaching opportunities, Web hosting for high school projects, and great camaraderie!

Registration Details
Registration deadline is June 1, 2008. Enrollment is limited to 25 participants per class, so register early!

Who Should Attend
Business, information technology, and marketing teachers interested in teaching database concepts, graphics, Web design, and computer programming.

Track A: Access & Friends
This track will cover database concepts, intermediate Access through advanced Access, SQL server with Oracle, and data-driven Web sites.

Track B: Graphics Galore!
This track will cover curriculum and typical assignments, using InDesign, Illustrator, and Photoshop. The last day will incorporate all topics together.

Track C: Web Design
This track is for teachers who have had some basic HTML and an introduction to Dreamweaver. Topics will include HTML and scripting tools, intermediate Dreamweaver, Flash, and XML.

Track D: Desktop Publishing
This track will cover the basics of desktop publishing, using Microsoft Publisher. Topics will include brochures, newsletters, fliers, web pages, e-commerce Web sites, design issues, and graphics. Track D also will include an introduction to Photoshop, “good design,” and technical communication concepts.

All sessions will be held in Fuller Hall.

Workshop Format
The five-day, $250 workshop includes lecture, hands-on lab practice, and assessment. Participants may choose one of four tracks.

Housing
Dormitory rooms are available for $150. The four-bedroom suites include full appliances and high-speed Internet ports. Please check in July 17 between 6 and 8 p.m., or contact Lynne Russell for alternate check in times.

Complete and mail the attached form, or register on the Web at www.techcamp.edu.
