Setup

graph 1

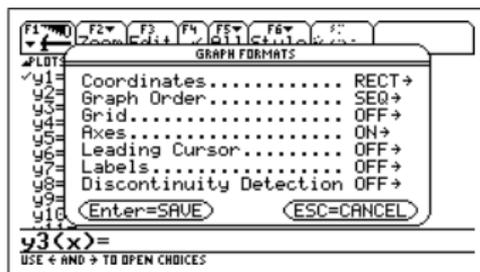

graph2

Setup

From your Homescreen go into the “y =” menu.

F1 9: Format

Graphing

Let's graph,

$$y = \frac{3}{8}x - 1$$

From the Homescreen go into "y =" screen.

Type in **y1 = (3/8)*x-1**

Press **ENTER**

Graph cont.

Notice the ✓ mark.

F2 **6**

F3 Trace

Graph cont.

Go to window menu

To graph press  

Graph Second

Add the new graph, $y = -\frac{1}{8}x^2 + 5$

On calculator, **y2 = (-1/8) * x^2 + 5**

Use Zoomstd.

F2 **6** 6: ZoomStd

Intersection

Find the Intersections between the graphs.

In Math menu, **F5** **5** 5: Intersection

Intersection cont.

1st Curve, **ENTER**

2nd Curve, **ENTER**

Lower? Left **ENTER**

Upper? Right **ENTER**

Zeros

Find the x -intercepts: called zeros.

Press, **F5** **2**

Lower?

Left

ENTER

Upper?

Right

ENTER

The y -value should be close to zero.
