

Programming 89

To run an already existing program :

From the home screen, go into the var-link menu by pressing **2nd** **[—]**, put the cursor on the program name and press **ENTER**. This will bring the program's name to your home screen. You must place a "closing" parenthesis at the end of your program's name, e.g.

```
ration()
```

Pressing **ENTER** will run the program.

To edit an existing program :

Go into the Program Editor, possibly **APPS** **7** **2**. Choose the program and press **ENTER**. Make any changes and then press **2nd** **ESC**, which saves the program.

Note: Be Careful that you don't make any changes that you do not want. After your write over a line and exit, the change is made for good.

To enter a NEW program :

Go into the Program Editor, possibly **APPS** **7** **3** and enter the program's name.

Type in the code.

Pressing **2nd** **ESC** saves the program.

To transfer programs from calculator to calculator :

- Plug the cable firmly into both calculators.

Receiver calculator :

- Press **2nd** **—** **F3** **2** (Set this calculator aside)

Sending calculator :

- Press **2nd** **—** . Use the **F4** key to check off programs you want to send.
- Press **F3** **1** to transmit the programs.
- Done. **ESC** out.

Done in T_EX.
