Café Soylent Green - Chapter 6

You will be completing the Tables Tutorial from your textbook, Chapter 6, pgs. 314-329. You will need to be at a computer that is connected to the Internet. Dreamweaver CS6 should be installed.

Complete the Tables Tutorial

Start on page 314 and follow the instructions in the text with the following exceptions:

Site Setup (pg. 314) – Be sure to set up a new site prior to beginning this tutorial. The instructions are in the text prior to step 1, but they can easily be overlooked. After setting up your site, you may get a message that looks something like this:

This is a result of this new local site pointing to a folder inside the CAS111d folder which you set up as the local root folder for your CAS111d Remote site. **THIS IS OK!** Click the OK button on the above message and proceed with the rest of the assignment. If you don't get this message, continue as usual.

Step 2 (pg. 314) – You can also open this file by double-clicking on the menu.html file in the Files Panel.

Step 3 (pg. 315) – make sure that your cursor is in the empty space beneath the headline "Café Soylent Green Menu" before you choose Insert → Table.

Step 5 (pg. 315) – NOTE: If you set the values on the Insert Table dialog box to 0, your web page will not validate as an HTML5 document. In order for your page to properly validate, you need to leave these fields blank and set the properties using CSS. For this particular exercise, you can follow the instructions as indicated in the book – just be aware that your page will not validate as HTML5.

Step 3 (pg. 320) – if you do not have the PTSansRegular font, go ahead and select any other font available. If you are working on a different computer from the one you complete Tutorial 3 (or a PCC classroom/lab computer) the PTSansRegular font most likely will not be available.

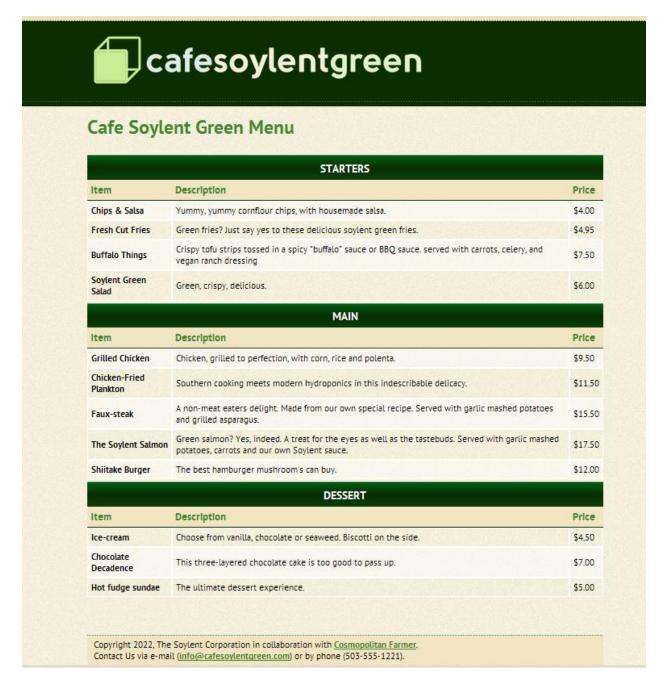

Step 14 (pg. 323) – After step 14, there is some text that starts with "Because you left..." Ignore this text – it is a typo and should not be there. (Be sure that you still complete the step instructions that are in bold print.)

Remainder of Tutorial (Pgs. 323-329) – Complete as instructed in your text.

When you are finished, upload your files to the SWS. Be sure to upload the entire textbook folder. Refer to the instructions on the following pages if you need a refresher on uploading.

Your finished page (about.html) should look like this when viewed in Firefox:

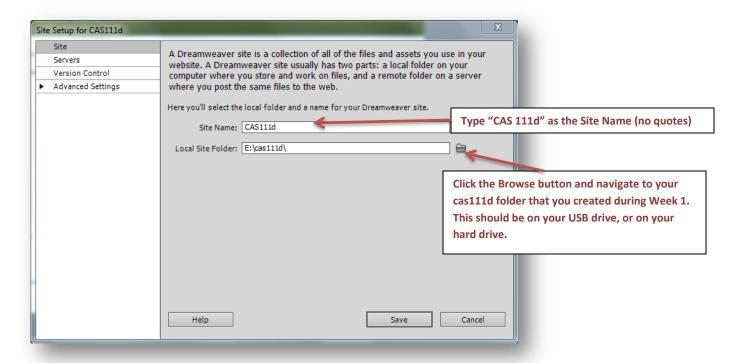

CAS111d: CAL8-2 (2/13) Page 2 of 5

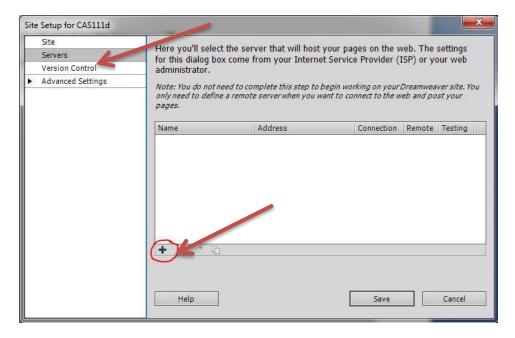

If you have already set up a CAS111d site, you can skip to page 4.

If you have **not** yet set up a **CAS111d site**, complete the following:

- 1. Choose Site → New Site.
- 2. Enter the following information:

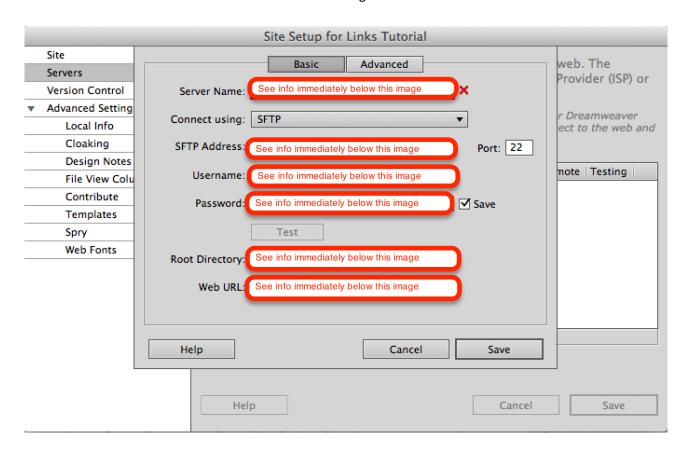

- 3. Click the Servers option in the list on the left-side of your screen.
- 4. Click the + button.

CAS111d: CAL8-2 (2/13) Page 3 of 5

5. Enter the information for the SWS as shown in the image below:

IMPORTANT: Be sure to replace the information in the image above with your specific class and student information as shown here:

Server Name: SWS

Connect using: Make sure you select "SFTP" and use Port "22" as shown above

• SFTP Address: sws.pcc.edu

• Username: Your MyPCC username. Example: sallysmith14

Password: Your PCC "G" number. Example: G0283748

Root Directory: student/cas111d_xxxxxxx_xxxxx_your username/

Example: student/cas111d_melany.budiman_20847_sallysmith14/

The Root Directory should be the path to your directory on your SWS account. The best way to enter this long path is to use your browser to go to sws.pcc.edu and navigate to your directory in this class. Then copy and paste the path from the browser's address bar.

Remember: your path will be different than this based on your course section number and name.

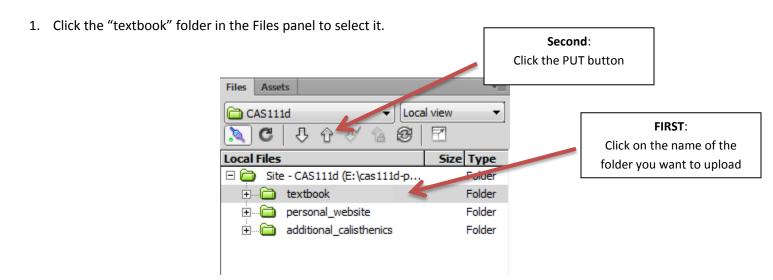

- The Web URL is not required and you can ignore it.
- The case and slashes are very important so be precise.
- 6. Click the TEST button to verify your connection. If you entered everything correctly, you should see a message that says, "Dreamweaver Connected to your Web Server Successfully"
- 7. Click SAVE.
- 8. Click SAVE again.

You are now ready to upload your files to the SWS.

CAS111d: CAL8-2 (2/13) Page 4 of 5

You will use the Files Panel within Dreamweaver to upload your files.

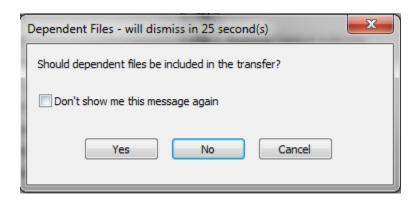

Make sure that you are viewing the CAS111d class site. You will know if you are by looking in the site dropdown list in the Files Panel.

- 2. Click the "Put" button (the upward pointing arrow)

 When you click the Put button, Dreamweaver will connect to the site that was set up in the Remote Site

 Definition. If this was not done correctly, it may have trouble connecting.
- 3. You may see a dialog box with a confirmation about Dependent Files. It doesn't matter if you click Yes or No in this case because there are no dependent files.

MOST IMPORTANT STEP:

- 4. Verify that your files went where you think they went!!! Using your browser, navigate to your directory in our classes' SWS directory. Then navigate to your /textbook /chapter06 directory. When you click this directory, your Café Soylent home page should magically appear on your screen. (Well, not magic actually it appears because you named this file index.html which is how home pages should always be named!)
- 5. If everything looks good, go back to D2L and continue working on this weeks' assignments.
